

ASTOUNDING LEARNING IN 2A!

In **Science and Technology** we have explored the forces of push and pull. We investigated these forces using balloons, play dough, bubble blowers and Scootle. We have learnt about gravity and what this means when an object is pushed or pulled.

In **Geography** we learnt to use Google Slides to present information on an overseas country we are connected to. We shared our presentations with the class.

In **writing** we wrote information reports about habitats. We found facts using Epic! and World Book Online.

In **Religious Education**, we investigated the sacraments. We learnt there are 7 sacraments and what they are. We explored scripture stories that linked to some of the sacraments.

In **Maths**, we have continued building on our addition and subtraction skills. We have also explored using arrays to solve multiplication and division problems. We often work with a learning partner to encourage us to explain our thinking.
