

Kindergarten at the Farm!

This term, Kindergarten had the opportunity to experience farm life for a day! As

part of our Science and Technology learning about living things and our Geography learning focussed on people and places, students developed their knowledge and understanding through 'hands-on' (a little furry, sometimes slimy) experiences.

Kindergarten explored the farm meeting and greeting

animals, investigating the vegetable gardens, observing sheep shearing, participating in whip-cracking, watching a working dog herd sheep and to top it all off, we enjoyed a terrific tractor ride around the farm.

Wow! What an amazing adventure!
