

Welcome to Year 4G Term 3 2019

Grandparents Day – STEM Challenge

This term we celebrated Grandparent's Day. The grandparents were invited into the classroom to help solve a STEM Challenge of building spaghetti tower that could support a weight. This was a great way to interact with valuable members of our school community and using their expertise to help solve the challenge.

Creative Arts

This term we have been looking at contemporary artists who incorporate digital technology to create a piece of art. We used their ideas and took two photos of our faces and overlapped them to create a distorted image.

Todd Woodbridge Cup

This term many children from our class represented the school in the Todd Woodbridge Cup. The children participated in a round robin tennis tournament against another school. The children enjoyed the modified version of tennis and practising their skills. What a great day!
